

TANNER ELECTRIC
C o o p e r a t i v e

Tanner Electric Cooperative in partnership with the Bonneville Power Administration is pleased to now offer free showerheads to members whose water is heated with an electric water heater. Inexpensive and simple to install, low-flow showerheads can reduce your home hot water consumption and water heating costs by as much as 50% . A low-flow showerhead is designed to deliver fewer gallons of water per minute but with the same pressure as a traditional showerhead.

Efficient use of water and energy resources is good for the environment, and results in lower utility bills.

Along with the showerheads, Tanner would like to offer our members a free Conservation Kit that includes:

(3) CFL light bulbs, (1) air filter whistle, (1) Refrigerator/Freezer Thermometer

(12) Draft stoppers, (1) Lime Light
